Structure of MSFS file system

Commands in MSFS file system

Let's create disk image

- Create `msfs create [disk_name] [size] [size_unit]`
- Mount `msfs mount [disk_name]`

```
test — java ◀ msfs create disk1 4 kb — 130x24
mamadhosein@Mohammads-MacBook-Air test % ./msfs create disk1 4 kb
mounting disk image ....
disk1 disk image not fount in directory!
disk1 disk created!
MSFS>>disk1.disk/

mamadhosein@Mohammads-MacBook-Air test % ./msfs mount disk1
mounting disk image ....
MSFS>>disk1.disk/
```

Commands in MSFS file system

Directory commands

- Create Directory mkdir mkdir [folder_name]
- Remove Directory rm rm [folder_name]
- Change Directory cd cd [folder_name] cd .. (parent directory)
- list Directories ls
- list Directories(Files seizes) ls -s

Commands in MSFS file system

File commands

- Create File touch touch [file_name]
- Remove File rmf rmf [file_name]
- Write File touch touch [file_name] [text]
- Read File cat cat [file_name]

Let's try MSFS!
